

Recently I found out that you are considering taking priority over a translator FM radio station I listen to each day. You are going to give a priority over this station to Low Power FM signal. I want to urge you to leave K-Love heard on station 90.3 and 90.7 alone. They provide great encouragement in my community by their upbeat music format. They have a positive impact on my community and I believe there would be a negative impact if they were forced off the air. It is in our public interest to keep them on the air. They provide quality, positive and encouraging music to our generation who is looking for a positive in a negative world.
